Report on A Study of the Infrastructure Facilities for Electric Vehicles in Pune City

A group of 6 students from HNIMR conducted a survey on A Study of the Infrastructure Facilities for Electric Vehicles in Pune City in collaboration with BKWSRC. The survey aimed to identify and address pressing environmental concerns in the local community. The students visited nearby areas to gather data on issue.

They interviewed residents, community leaders, and local authorities to gain a comprehensive understanding of the challenges faced by the EV users. The survey findings were compiled into a detailed report that highlighted the key issues and proposed solutions.

The report was shared with BKWSRC and local government authorities to facilitate the implementation of necessary interventions. HNIMR's involvement in this social awareness initiative demonstrates its commitment to social responsibility and its efforts to bridge the gap between academia and community development.
