Report on the Adverse Effect of Increased Screen time on Teenager's Eyes During COVID-19.

A group of 6 students from HNIMR conducted a survey on the Adverse Effect of Increased Screen time on Teenager's Eyes during COVID-19 in collaboration with BKWSRC. The survey aimed to identify and address the understanding of eye diseases caused because of increased screen time, awareness of ophthalmic health, Ocular health of students in a society. The students visited nearby areas to gather data on issue.

They interviewed students between age group 10-20 years in Pune to gain a comprehensive understanding of the challenges. The survey findings were compiled into a detailed report that highlighted the key issues and proposed solutions.

The report was shared with BKWSRC and local government authorities to facilitate the implementation of necessary interventions. HNIMR's involvement in this social awareness initiative demonstrates its commitment to social responsibility and its efforts to bridge the gap between academia and community development.
